

# Team Feedback: James Blackwell

**Role:** Co-Developer (About), Documentation

## Quick Summary

James focused on the project's foundational written content and essential documentation. He partnered with Kellen to nail the story on the **About Page** and made sure our **README.md** file was clear for everyone.

## Key Wins

- **Nailing the Story:** Did a great job co-developing the **About Page** content, especially the "Story Behind the Grill" narrative, working closely with Kellen.
- **Documentation Master:** Ensured the project had professional and accurate documentation by working on the **README.md** file with Sammer. This is a crucial, often overlooked part of any project!

## Next Steps (Future Focus)

- You're great at collaborative content—keep that up!
- For the next project, challenge yourself to dive into the technical side, like learning some of the CSS or grid concepts (which Xavier used) to round out your development skills.
